

ECO FRIENDLY VERSAL® PIGMENT YELLOW 74

Company SYNTHESIA introduces an innovative quality of selected Versal® Pigment Yellow 74 that fully reflect actual market trends as well as eco-legislation requirements related to content of residual impurities presented in colored products designed for the **toys and food** contact application.

That pigment quality is produced by a technological process that minimize the formation of legislatively problematic primary aromatic amines.

VERSAL YELLOW 5GXT

C.I.: Pigment Yellow 74

Chemical Class: Monoazo

PROPERTIES:

- **controlled content of o-anisidine max. 20 ppm**
